

Read the Gap Analysis and Risk Analysis previously generated.

Do not generate application code.

Create a Sprint 0 Resolution Proposal containing:

1. Recommended Firestore collection design optimized for Firebase cost and simplicity.
2. Embedded vs referenced document strategy.
3. Search strategy recommendation for MVP.
4. Impact Score placeholder algorithm recommendation.
5. Benchmark seed dataset recommendation.
6. API contract definitions:
7. Success response
8. Low confidence response
9. Validation error response
10. Firestore index recommendations.
11. Security rule recommendations.
12. Architecture risks and mitigations.

Provide rationale for every recommendation.

Optimize for:

- Cost
- Security
- Simplicity
- Scalability

Do not generate source code.
